8 Pin Molex wiring guide	8 Pin Molex connector image
<p>Pin (1) GMLAN (Yellow wire)            Pin (3) Ground (Black wire)            Pin (4) Not Connected (White/Red wire)            Pin (5) GMLAN (Blue/White wire)            Pin (7) +12Volt Constant Power (Red wire)            Pin (8) Not Connected (White/Blue wire)</p> <p>Note: Due to manufacturing variations, the wire colors may not match the description above, but the pin positions remain the same.</p>	<p>8 Pin Molex Connector</p> <p>Wire Side View</p>

Install Guide
<ol style="list-style-type: none"> <li>1. Remove trim strip over glove box</li> <li>2. Remove side cover of the dash on passenger side of vehicle</li> <li>3. Remove under dash panel on passenger side of vehicle</li> <li>4. On either side of the glove box with the glove box open, you will see (2) covers. Remove the covers to expose screws</li> <li>5. Remove screws from both sides after covers have been removed</li> <li>6. Remove (3) screws from the top of the glove box</li> <li>7. Remove (2) screws from the underside of the glove box</li> <li>8. Gently pull glove box forward to expose wiring</li> <li>9. Reach through the bar that the connector is connected to and unclip, set aside the glove box</li> <li>10. On the passenger side of the center console towards the front of the car, gently remove side trim cover (just pulls off)</li> <li>11. You will see the main power harness on the side of the radio. Unplug the main harness and plug in the T-Harness with the module. (Module should fit in lower part of center console towards the front of the vehicle)</li> <li>12. Plug in the video harness into the unpopulated plug above the main harness</li> <li>13. Plug in the A/V source</li> <li>14. Put the vehicle back together in reverse order</li> </ol>

Operating Instructions
<p>Note: The first time this kit is used, <i>Aux Mode</i> must be activated on the radio by selecting: <b>Options</b> → <b>Menu</b> → <b>Aux</b>.</p> <p>To play the Aux video source, just press the <b>"AUX"</b> button on the Radio.</p>
