

# GMVIM Version Changes

**Version 725:**

- 1) Corrected startup issues that would sometimes cause no audio.
- 2) Corrected a second issue that would cause "garbled" audio from radio.

**Version 818:**

- 3) Corrected an issue with system volume that would make the radio seem to mute and unmute randomly.
- 4) Corrected an issue where the radio would sometimes fail to wake when started or when resuming from an extended sleep.

**Version 319:**

- 5) Enhanced compatibility with Cadillac STS to enable Video in Motion to be selected by double-pressing the Mute button instead of using a switch.
