

## Installation Manual 997 Double-DIN Dash Kit

- Place the metal frame into the dashboard.  
Adjust it vertically with 10 mm of space to the top and bottom.

- Use a soldering iron to heat up the plastic surface under the metal hooks left and right (4 on each side) and press them into the heated plastic. (see arrows)

- Push the head unit into the fixed metal frame until it snaps in.

Place the fascia plate.

Reinstall everything in reverse order to finish installation.

# Installation Manual 997 Double-DIN Dash Kit

1. Remove 2 Torx (TX25) screws (1 on each side) left and right, located at the front end of the center dash.

*Note:*  
The screws are hidden in the carpet (see photo.)

2. Remove 4 Torx (TX15) screws (2 on each side.)

3. Remove the side panels (fixed with clips) by pulling them towards you.

4. Loosen one screw (7 mm,) located at the right side of the head unit.

*Note: Just loosen the screw; don't remove! There is no screw on the left side.*

5. Release the 4 retaining brackets of the OEM head unit (2 on each side) by turning them 90° (see arrows)

6. Remove the OEM head unit.

Mount the metal brackets to the Double-DIN head unit.

*The position of the copper colored holder can be adjusted to your needs for a perfect fit (see sample.)*
