UCTv2

Dodge/Jeep uConnect (RA3/RA4) Dual Camera Interface
NTV-KIT762

Overview

The *UCTv2* series Interface integrates multiple video inputs to the factory 8.4" touch screen in compatible 2013+ Dodge and Jeep vehicles, with additional expansion options for future upgrades.

   UCTv2 (KIT762): Add up to 2 additional inputs (*or 1 while retaining OEM tailgate camera*).

   UCTv2+ (KIT763): Same functionality as the standard system, but includes an AVSW for audio integration (AV input).

   UCTv2 MULTI-CAM (KIT764): Same functionality as the standard system, but includes a data-controlled **SVS-6** switcher capable of adding 6 additional video inputs all while retaining any existing OEM cameras.

*NOTE: The UCTv2 MULTI-CAM kit is **required** for RAMs that have an OEM Cargo Camera or to emulate the Cargo Camera menu.*
Kit Content

Plug & Play
T-harness

NTV-ASY245

USB Cable (updates)
NTV-CAB009

OUTPUTs 2 & 3 send 12v (+) with corresponding button press (force cam)

PIN #	Description	Color
1	12v (+) Constant	Yellow
2	INPUT 1: *VIM Activation*	Red
3	*--NOT USED--*	Blue
4	INPUT 3: *Front CAM/Cargo Cam (selectable)*	Pink
5	*RX (not present)*	--
6	RCA MALE	--
7	RCA Shield	--
8	CAN HI (Radio Side)	Brown/White
9	CAN HI (Car Side)	Blue/White
10	Ground (-)	Black
11	OUTPUT 1 *Provides 12v (+) ACC* **OUT**	White/Red
12	OUTPUT (2) when **AUX** is activated (AVSW V1 Trigger)	Blue/White
13	OUTPUT (3) when **Front CAM** is activated (AVSW V2 Trigger)	Purple
14	TX INPUT (UART control to SVS-6 RX)	White/Brown
15	RCA Female (Normally Open)	--
16	RCA Female (Normally Closed)	--
17	CAN LO (Radio Side)	Brown
18	CAN LO (Car Side)	Blue

18	17	16	15	14	13	12	11	10
9	8	7	6	5	4	3	2	1

Wire Side

Dash Disassembly (basic RAM)

1. Remove the Torx t20 screw at the right rear of the pocket on the right side of the dash.

2. Remove (2x) Torx t20 at the top of the dash. They are hidden beneath a rubber mat.

3. The face should be free now, pull straight outwards (towards you) with medium force. Use plastic panel tools if necessary.

Pin #	Description	Color
2	CAN HIGH	Dark Blue
12	CAN LOW	White
31	Diff Video (-)	Green/Brown
32	Diff Video (+)	Green/Orange
33	Shield	
43	Ground	Black
44	Constant 12v	Red

4. Remove (4x) 7mm screws that secure the LCD touchscreen.

UCTv2 Module Installation

1. After removing the factory radio, grab the provided **Plug & Play T-harness** and connect the female side to the factory 44-pin plug. Make certain the lock connects together securely.

2. Install camera(s) and run signal/power leads into the front dash opening. ***Note:*** 12v ACC is provided from **output 1** (PIN 11, white/red). ***If connecting any camera (s) which draw 1amp or more, trigger a relay with this output instead powering directly!***

3. Make required connections as shown below in FIG 1. If this vehicle has an OEM reverse camera, connect the RCA's among the Plug & Play T-Harness like shown in FIG 2 (page 5).

4. Connect the male side of the **Plug & Play T-Harness** to the main radio display. Proceed to page 5 for programming.
FIG 1

Input 1 — VIM & CIM Enable
Input 2 — Force Rear Cam
Input 3 — Force Front Cam
Output 1 — 12v (+) ACC OUT
Output 2 — 12v (+) AUX OUT
Output 3 — 12v (+) FRONT OUT

Audio RCA pass-through: keep connected unless using

UCTv2 Programming

Programming the UCTv2 is performed in *the vehicle, through the factory dash MUTE button, TUNING KNOB, and CLUSTER LCD for feedback.*

Press and HOLD (15 seconds) to enter NAV-TV settings mode

While in NAV-TV settings mode only: Rotate clockwise (**slowly**, one detent/time) to scroll through options. Press ENTER to change setting.

1. Before attempting to program, after making connections, let the vehicle perform a CAN-reset: Close all doors/trunk/hood, lock the vehicle and waiting 10 minutes before proceeding to program.
2. Turn the vehicle's ignition on. Be certain you're resting in **FM mode** (see an FM station frequency on the cluster), otherwise the cluster information may not display.

FM 98.1

To show the FM source on the **cluster**, first clear any messages shown (door status, etc) with the UP or DOWN arrows on the steering wheel. Press the audio source button until 'FM' is displayed.

Center button:
Change Audio Source

3. Close all doors (*door status may override NAV-TV settings cluster feedback*).
4. View the chart on the next page for settings descriptions and the diagram above to begin programming.
5. NAV-TV programming mode will time out (back to factory) after 15 seconds. *Scroll to the end of the settings menu and select* **'EXIT'** *to exit and save settings.*

UCTv2 Programming Parameters (OEM Cluster)

Parameter (cluster)	Adjustment Options	Description
NAV-TV Settings	TUNE-Next Item / Enter Change	Rotate TUNE knob to access different menus, press knob inwards to enter/change setting
GEAR	AUTO / STICK	**AUTO:** Select this option if the vehicle has an automatic transmission **STICK:** Select this option if the vehicle has a manual transmission
SWITCH	RELAY / AVSW / SVS-6	**RELAY:** Uses RCA inputs on the UCTv2 module itself (UCTv2) **AVSW:** Select when using AVSW board (UCTv2+) **SVS-6:** Select when using SVS-6 switcher (UCTv2 MULTI-CAM)
RVC	OEM / AFTERMARKET / OFF	**OEM:** Vehicle has a manufacturer-installed reverse camera. **AFTERMARKET:** Any aftermarket reverse camera. **OFF:** Choose if not adding a reverse tailgate camera.
F. RVC	OFF / ON	**ON:** Enables option of forcing rear view camera.*
FRONT CAM	OFF / ON / <8	**ON:** Enables option of installed front camera. **<8:** Front camera will display between 1-8 MPH.
AUX VID		
TURN SIGNALS		***AVAILABLE WITH ADDITIONAL HARDWARE.*** ***See NTV-KIT763 (UCTv2 +) or KIT764 (UCTv2 MULTI-CAM)***
Cargo CAM**		
INPUT3		
EXIT		

The *SWITCH* you choose determines which options will display on the cluster, to reduce confusion.

Option color	SWITCH chosen:
	ANY

Factory Rear camera is controlled via LIN. Forced OEM RVC is not supported with the UCTv2.

Programming for 2016+ Vehicles equipped with Panasonic Radios (CarPlay/Android Auto)

- For vehicles later than 2016 and equipped with the new *Panasonic* radio, the method for programming rear-camera has changed and requires additional steps. Follow the procedure below for these applications:

1. After Installing the kit and adjusting the menu for desired options, shut down the vehicle with the key (or push button).
2. Disconnect the ***vehicle-side*** of the supplied T-Harness for 5 seconds, then reconnect it.
3. Turn the vehicle on (to ignition, beyond accessory), wait ***1 minute***.
4. Turn the vehicle off again. ***Wait for LED on module to go out.*** Wait for 30 more seconds.
5. Turn the vehicle on (to ignition, beyond accessory), wait for the radio to fully boot. Wait for 30 more seconds.
6. Turn the vehicle off again. ***Wait for LED on module to go out.*** Wait for 30 more seconds.
7. Turn the vehicle on once more and the camera should be programmed and functioning properly.

For further information on this process and video reference, see our YouTube video here:

UCTv2 Camera Force Buttons

Force front camera: Press & hold (2 sec) to activate

Force rear camera: Press & hold (2 sec)

CIM: Hold (3 sec) to activate (not supported for 2016s)

'13-'17 RAM, Grand Cherokee, Viper

Force rear camera: Press & hold (2 sec)

**CIM:** Hold (3 sec) to activate (not supported for 2016s)

Force front camera: Double-tap Front Defrost

'15-'16 SRT Charger, SRT Challenger, SRT 300

UCTv2 Camera Force Buttons (continued)

- For some 2017 SRT vehicles, the radio has changed and is clearly indicative by the radio control buttons or the GUI on the touch panel. For these vehicles, use the following buttons to force video sources:

VIM Enable:
Press and hold MUTE

Force front camera:
Double-tap Front Defrost

Force rear camera:
Double-tap Rear Defrost

2017 SRT Charger Hellcat, SRT Challenger Hellcat

UCTv2 Operation Information

Rear Camera Operation: Placing the vehicle in to reverse will automatically display any connected camera. This image will take precedence over all other images.
Force Rear Camera: To force rear camera, press and hold radio *'BACK'* button for 2 seconds. To exit forced rear camera, press and release radio *'BACK'* button. *Note: forced rear camera is only supported on aftermarket cameras.*

2 seconds

Force Front Camera: To force front camera, press and hold radio *'SCREEN OFF'* button for 2 seconds (truck chassis) or *'FRONT DEFROST'* (car chassis). To exit *Front Cam* mode, press and release the *'BACK'* button.
- If using AUX video mode for an A/V source, the red & black RCAs located on the *Plug & Play T-Harness* must be opened up with an AVSW (KIT763 includes AVSW, or it can be ordered separately as NTV-KIT224).

2 seconds

Activate CIM (Control in Motion): To activate CIM for factory navigation, press and hold the 'Volume' button for 3 seconds (CIM will disable automatically after 3 minutes). This function will also keep the Cargo Camera enabled for 3 minutes, and will reset upon every key cycle.
NOTE: Activating the CIM function will NOT bypass video in motion at this time, if equipped.

3 seconds

FAQs

Q1. I can't get into programming mode.

A1. Turn off the vehicle and remove the key. Close all points of entry and use the remote to lock the vehicle. Wait approx. 5 minutes without opening or disturbing the vehicle. Unlock and cycle the ignition to the 'RUN' position. *Make certain that the cluster is in FM radio mode before you begin programming;* and no errors are displayed (door open, etc), otherwise the cluster information might not display. Hold down the "MUTE" button until you see the display options post on the cluster.

Q2. When I try to force (front, rear) camera, nothing happens.

A2. Make certain you've enabled the options you want to use in the NAVTV settings mode and that you scrolled to the end *and selected 'EXIT' (or it will not save)*.

Q3. I hear no audio when my auxiliary source is playing on screen.

A3. Verify that the audio RCAs are connected properly to the AVSW.

Q4. Everything works properly, but when an audio source is connected to the 3.5mm audio jack, there's no audio.

A4. Make sure the audio RCAs are connected together on the Plug & Play harness.

Q5. When I place the vehicle into reverse, I get a black or blue screen.

A5. Make sure the camera is getting sufficient power and the RCA is connected to the proper yellow RCA on the 24-pin harness.

Q6. The camera image is displayed properly when the vehicle is in reverse, but there's only a black or blue screen when the camera is forced.

A6. Make sure the camera power is not connected to the reverse lamps. Camera power needs to be connected to an accessory wire (cigarette lighter). If the camera is OEM, forcing it to display in any gear is *not* supported.
