The NAV-TV MOST-AUX for Range Rover is a M.O.S.T. fiber optic interface that introduces audio into select fiber-equipped Range Rover vehicles with no degradation in sound quality. AUX audio is triggered with an external toggle switch (not included). Unlike cheap FM-based modules that transmit sound via an FM station, the MOST-AUX interfaces directly into the OEM fiber system and is designed to work specifically with a compatible Range Rover vehicle.

Car Radio Versions

M.O.S.T. equipped system

MOST-AUX for Range Rover Compatibility Chart
