The RGB7+ is a universal interface for converting composite video to RGB (RGS: red, green, blue, sync). It will also retain any factory image, and only displays input signal when triggered. This interface is used in select 7 series BMW with a factory LCD screen and accepts 2 video inputs.

Note1: The nav/map **must** be displayed on screen for the camera image to appear. The map can be changed from split-screen to full-screen using the car's controls.

Note2: If the vehicle is equipped with parking sensors and the navigation is set to full-screen, then the sensors must be turned off after shifting into Reverse to see the camera.

Car Radio Versions

E60

RGB7+ Compatibility Chart

Model	Year Range	Version	Radio	Notes
BMW/7 Series	2002-2005	USA, Rest of World, Europe	E60	
BMW/7 Series	2006-2008	USA, Rest of World, Europe	E60
