

## FLIR PathfindIR w/ Monitor & Bracket

Price: **\$3199.99**

 manufacturer  
NAV-TV

 ID SKU NTV-KIT271

 weight  
4.00 Lbs

The PathFindIR camera is a sophisticated thermal sensor that converts thermal content (heat) of a scene into a 2-dimensional image for display on a video monitor inside your vehicle. In other words, this camera reads (views) heat, rather than light as a typical camera would. The PathFindIR is a high quality, true night-vision camera with nearly universal mounting applications.

This SKU includes the bracket, mount for FLIR and an LCD monitor.
