This kit has been replaced by [KIT964 Bentley-Audio V2](#).

The BNT Audio Kit allows the user to add 1 or 2 auxiliary audio inputs to the factory media systems in select Bentley vehicles. Currently this kit is not plug & play and must be manually wired in to the system.

When used together with the BNT-Kit (which is a video only interface for these vehicles,) this module can be used to add 2 audio/video sources to the radio.
