 weight  
1.00 Lbs

 market  
USA, Rest of  
World, Europe

 UPC/EAN  
00616909358007

The NAV-TV SteerBlue interface gives you the ability to control your mobile Smartphone or Tablet from your factory steering wheel controls. This is a great option if you have a Tablet mounted in your dashboard for control of volume up and down, track up and down, pause & play, as well as device dependent voice recognition, home screen or task manager. The interface must be used in conjunction with a vehicle compatible steering wheel control interface from PAC©, Metra© or iDataLink© and is limited to these devices' ability to properly deliver steering wheel command information to the SteerBlue interface.

### Car Radio Versions
