DR650S-2CH IR

Secure your vehicle from the inside

BlackVue DR650S-2CH IR was designed with professional drivers in mind.

It monitors both the front and the interior of a vehicle, making it ideal for taxi or rideshare drivers. The front camera records the road ahead in Full HD, while the interior IR (infrared) camera captures every detail of the cabin, even in pitch black lighting conditions.

A CLEAR IMAGE EVEN IN THE DARK

The IR camera is connected to the front camera via coaxial cable (available in 1.5m and 6m options).

The Interior IR camera truly sees in the dark, even pitch-black lighting conditions, thanks to its integrated infrared LED light that activates automatically based on the ambient light.

CUSTOMIZABLE INTERIOR CAMERA

The Interior IR Camera automatically activates its infrared LEDs based on the ambient light.

Using the BlackVue App or Viewer, you can further customize the way it operates.

- 180° Image Rotation to accommodate your setup: if the image comes out upside down, just activate this feature and it will fix the image orientation.
- Security LED ON/OFF (for stealth in Parking Mode)
- Recording ON/OFF (for Live View access without recording)
- Power ON/OFF (for power saving)

Built-in Wi-Fi and GPS

The GPS adds geolocation and speed data to your videos.

With Wi-Fi, connect to your BlackVue with a smartphone or tablet. Wi-Fi also lets your BlackVue connect to BlackVue Over the Cloud via any home or mobile Wi-Fi hotspot.

Built-in Impact & Motion Detection

Built-in impact and motion detection enable your BlackVue to switch between 3 different recording modes (Normal/Event/Parking) automatically depending on the circumstances.

Videos files are marked accordingly so that you can easily find relevant ones with the BlackVue Viewer.

Loop recording: Your BlackVue automatically writes over the oldest files when the memory is full.

BlackVue App (iOS, Android) and Viewer (Windows/Mac)

The BlackVue Viewer is free to download and use.

It lets you easily change your BlackVue configuration settings.

Displays videos chronologically and by type (Normal/Event/Parking) to quickly identify and archive important footage.

BlackVue Over the Cloud

Connect to your BlackVue anytime, from anywhere in the world with [BlackVue Over the Cloud](#).

Enjoy **remote Live View** and **Push Notifications** to your phone.

Back up important videos to the free Cloud storage.

Play and download videos from your dashcam's memory or the Cloud from anywhere.

Enjoy **Two-way Voice Communication** with the driver from the app through the BlackVue's integrated speaker and mic. Check the BlackVue Over the Cloud page for more information

TAMPER-PROOF CASE (OPTIONAL)

The BlackVue Tamper-Proof Case is a security accessory for BlackVue DR650S Series dashcams. It blocks physical access to the microSD card slot, and prevents unplugging the power and coaxial cables, thus highly reducing risks of data tampering.

Intelligent Parking Mode monitoring

with the optional Power Magic Pro or Power Magic Battery Pack

Rest easy, knowing that your car is being monitored while you are away.

BlackVue automatically switches to Parking Mode to monitor your parked vehicle, but only writes to the memory card when something happens (motion or impact detected), which has two benefits:

- Less chance for important files to be overwritten during long Parking Mode sessions.
- Extended memory card lifespan in the long run.

Additionally, the DR650S Series features **Voice Notifications** in case of Parking Mode Event recordings. Upon switching from Parking to Normal Mode, your BlackVue will alert you if an Event was recorded while your vehicle was parked. This way, you can check the recordings right away and back up important files to your phone or the Cloud if necessary. It might also alert you of possible damage to your vehicle that you did not notice at first.
