

MOST-H.U.R. MB v2

Price: **\$649.00**

The MOST-HUR MB V2 is a radio replacement interface for Mercedes Benz ML, GL & R vehicles equipped with an external M.O.S.T. fiber optic amplifier. The module allows the factory amplifier, speakers and sound quality to be retained when adding a modern aftermarket radio. Other components in the factory system, such as a CD changer, satellite radio, telephone module, DVD player, or any other factory component in the M.O.S.T loop will not need to be removed, but will not function after the installation.

Note: Steering wheel controls are *only* supported for Kenwood* and Alpine radios. Pioneer and Sony are not supported at this time.

**(Currently not compatible with Kenwood radios manufactured in 2018 or newer.)*

UPDATE: See pic 3 for incompatible amplifier.
