ENABLE PARKING MODE

Power Magic EZ is an OBD kit designed to **power your BlackVue dashcam in Parking Mode.**

With BlackVue Parking Mode, let your dashcam monitor your vehicle while you are away. Protect your car in case of hit-and-runs and expedite insurance claims!

PLUG-AND-PLAY INSTALL

It is really that easy: plug Power Magic EZ into your vehicle's OBD and your dashcam's power socket.

That's it, you're done with the installation!

TIMER/VOLTAGE CUT-OFF

Safely start your car after long Parking Mode sessions.

Power Magic EZ protects your vehicle's battery from discharge in two ways.

Timer cut-off: set up a shutdown timer from 6 hours to infinity.

Voltage cut-off: shuts down your dashcam if power drops to 11.8/12/12.5V.

PARKING MODE SWITCH

When you don't need to monitor your vehicle, switch Parking Mode off.

The **Parking Mode switch** deactivates Parking Mode monitoring only.

This way, if you forget to turn it back on, your dashcam will **still record your drives.**
